IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

**DETAILED ACTION**

1. Claims 1, 3-7, and 10-12 are allowed.

***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 29 January 2009 has been entered.

***Examiner's Amendment***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Farrell (Reg. # 57,291) on 29 April 2009.

The application has been amended as follows:

Replace claim 1 with the following:

- 1. An optical disk apparatus for recording data on a recordable optical disk having a power calibration area and a recording management area both located on an inner periphery thereof, and an area located radially inwardly of the power calibration area and the recording management area, the optical disk apparatus comprising:
- a laser diode for emitting a laser beam;
  - a laser diode driver module for driving the laser diode;
  - an objective lens for constricting the laser beam;

Art Unit: 2627

objective lens driving means for driving the objective lens in a radial direction of the recordable optical disk;  
a front monitor for detecting a portion of the laser beam emitted from the laser diode to monitor a laser power of the laser beam; and  
control means for controlling the laser diode driver module and the objective lens driving means,  
wherein said control means controls the objective lens driving means such that the laser beam is irradiated on the area in a defocused state, but is not irradiated on the power calibration area or the recording management area, while controlling the laser diode driver module for emitting the laser beam to observe an optical amount of the irradiation using the front monitor for the purpose of adjusting the laser power,  
wherein light returned from the area of the recordable optical disk is not substantially detected.--

Replace claim 3 with the following:

--3. The optical disk apparatus according to claim 1, wherein the objective lens driving means is operable to cause the objective lens to seek a location close to an innermost periphery of the power calibration area and subsequently move the objective lens more radially inwardly than the power calibration area and the recording management area.--

Replace claim 4 with the following:

--4. The optical disk apparatus according to claim 1, wherein the objective lens driving means includes a slider for roughly moving the objective lens and a tracking coil for finely moving the objective lens, and wherein upon moving the objective lens inwardly beyond the power calibration area and the recording management area, the objective lens is roughly moved by using the slider.--

Art Unit: 2627

Replace claim 5 with the following:

--5. The optical disk apparatus according to claim 1, wherein the objective lens driving means includes a slider for roughly moving the objective lens and a tracking coil for finely moving the objective lens, and wherein upon moving the objective lens inwardly beyond the power calibration area and the recording management area, the objective lens is roughly moved by using said slider and thereafter said objective lens is finely moved by means of the tracking coil.--

In claim 6, line 1: "An optical disk apparatus" has been changed to --The optical disk apparatus--.

Replace claim 7 with the following:

--7. An optical disk apparatus for recording data on a recordable optical disk having a power calibration area located on an outer periphery thereof, and an area located radially outwardly of the power calibration area, the optical disk apparatus comprising:

- a laser diode for emitting a laser beam;
- a laser diode driver module for driving the laser diode;
- an objective lens for constricting the laser beam;
- objective lens driving means for driving the objective lens in a radial direction of the recordable optical disk;
- a front monitor for detecting a portion of the laser beam emitted from the laser diode to monitor a laser power of the laser beam; and
- a control circuit for controlling the laser diode driver module and the objective lens driving means,

wherein the control circuit controls the objective lens driving means such that the laser beam is irradiated on the area in a defocused state, but is not irradiated on the power calibration area, while controlling the laser diode driver module for emitting the laser

beam to observe an optical amount of the irradiation using the front monitor for the purpose of adjusting the laser power, wherein light returned from the area of the recordable optical disk is not substantially detected.--

In claim 10, line 1: "An optical disk apparatus" has been changed to --The optical disk apparatus--.

In claim 11, line 1: "An optical disk apparatus" has been changed to --The optical disk apparatus--.

In claim 12, line 1: "An optical disk apparatus" has been changed to --The optical disk apparatus--.

#### ***Allowable Subject Matter***

4. The following is an examiner's statement of reasons for allowance: the prior art of record, either alone or in combination, fails to teach or fairly suggest, in claims 1 and 7, where the control means controls the objective lens driving means to irradiate a laser beam in a defocused state on an area located radially inward of an inner PCA area or radially outward of an outer PCA area while adjusting the power of the laser beam by using a front monitor to monitor a beam emitted by a laser diode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
